Yealink SIP VP-T49G Release Notes of Version

51.23.0.20

1. Introduction

- Firmware Version:
T49: 51.23.0.11 upgrades to 51.23.0.20
- Applicable Models: T49
- Release Date: Aug 8th, 2017.

2. New Features

1. Added the feature that after you register a YMS account on SIP-T49G, and the administrator has configured the permanent VMR via the Yealink Meeting Server as well as synchronized the permanent VMR to the SIP-T49G, the permanent VMR will be shown in the contact list on SIP-T49G. The permanent VMR is put on the top by default, and is with a VMR icon as distinguish.
2. Added the feature that if you enable Automatic invited to conference via YMS and select T49G as Device type for example. Then you register a YMS account on SIP-T49G, when the scheduled conference begins, the endpoint will receive a call to invite you to join the conference, and the LCD screen will display “(user xxx) invite you to join (the theme of the conference) Conference ID: XXX”.
3. Added the feature that when you register a Yealink Cloud account by using the PIN code, you can configure its server via phone user interface at the path Menu -> Advanced (default password: admin) -> VC Account -> Cloud Account -> Server (default value: yealinkvc.com).
4. Added the feature that when you register a Yealink Cloud account by using the PIN code, you can configure its server via web user interface at the path Account -> VC Account -> Cloud Account -> Server (default value: yealinkvc.com).

3. Optimization

1. Optimized the feature of anti 30% video packet loss.

4. Bug Fixes

None
