

ADSL2/2+ Router

Upgrade Firmware via Web

Reset to Default Setting

- Reset to default setting first

The screenshot displays a web interface with a navigation bar at the top containing the following tabs: HOME, EZ SETUP, CONFIG, ADVANCED, TOOLS, and STATUS. The 'TOOLS' tab is highlighted with a red box and labeled with a red '1'. Below the navigation bar, the 'System Commands' menu is visible on the left, with the 'System Commands' header highlighted by a red box and labeled with a red '2'. The menu items include Remote Log, User Management, Update Gateway, Ping Test, Modem Test, and Save All. The main content area is titled 'System Commands' and contains a descriptive paragraph: 'System Commands allow you to carry out basic system actions. Press the button to execute a command.' Below this text are two buttons: 'Restart' and 'Restore Defaults'. The 'Restore Defaults' button is highlighted with a red box and labeled with a red '3'. To the right of the 'Restart' button, there is a note: 'Use this button to restart the system. If you have not saved your configurations, the Gateway will revert back to the previously saved configuration upon restarting. NOTE: Connectivity to the unit will be lost. You can reconnect after the unit reboots.' To the right of the 'Restore Defaults' button, there is another note: 'Use this button to restore factory default configuration. NOTE: Connectivity to the unit will be lost. You can reconnect after the unit reboots.'

Upgrade Firmware

- Upgrade Firmware via web page
- Select Firmware, file name should be “nsp.annexA.firmware.upgrade.img” or “nsp.annexB.firmware.upgrade.img”

The screenshot illustrates the steps to upgrade the gateway firmware via a web page. The interface is divided into several sections:

- Navigation Menu:** Located at the top, it includes tabs for HOME, EZ SETUP, CONFIG, ADVANCED, WIRELESS, **TOOLS** (highlighted with a red box and labeled '1'), STATUS, and HELP. A sidebar menu on the left lists various system commands, with **Update Gateway** (labeled '2') selected.
- Update Gateway Section:** This section contains instructions: "To update your gateway firmware, choose an updated firmware image or configuration file in 'Select a File', and then click the Update Gateway button. Additionally, you may download your configuration file from the system by clicking Get Configuration." Below the instructions is a "Select a File:" field containing the path "D:\document\firmware\A0227_112" and a "Browse..." button (labeled '3').
- File Explorer:** A file explorer window is open, showing the directory "web_update". The file "nsp.annexA.firmware.upgrade.img" (labeled '4') is selected. The "Open" button (labeled '5') is highlighted.
- Update Gateway Button:** A blue button labeled "Update Gateway" (labeled '6') is visible, which is used to initiate the firmware update process.

Upgrade Firmware

- Upgrading will take about 3~4 mins and show this page
- Ping 192.168.1.1, if the ping get “Request time out” for a while, means upgrading firmware is successful and router is rebooting
- Done !
